

LaGuardia Community College STEM CLUB PRESENTS

March 23rd; 12:00 -2:00 PM ; Room E316

How much is 60 Joules of energy? What is the difference between Energy and Power?

Do we know the number of galaxies in the universe? How can we estimate it?

Is there other intelligent life in the universe?

$$D=vi*t+1/2*a*t^2$$

Why do all object free fall at the same rate?
Can we prove it experimentally?

Come and get the answers of these questions by doing fun activities.
You will be also informed about research opportunities in Physics , Astronomy, Astrophysics and Math

**Presenters:
Dr. Senkov; Dr. Sheffield;
Dr. Jaafar**
