

# Mac OS X iDVD

---

## *Handout Objectives*

1. Magic iDVD
2. One Step DVD
3. Custom DVD
4. Burning DVD

## **Overview:**

**This lesson will show quick overview of the iDVD application on your Mac OS X. iDVD is an application, which is a part of the Apple iLife suite. This application lets you create outstanding DVD's**

### **1. Magic DVD**

First open iDVD, click Magic iDVD button. Type a Name of your DVD that will appear in your Main Menu screen. Next choose one of the Themes. Later you can change the theme if you like. Next step; add movies and photos. To do that, choose one of the following on the right of the Magic iDVD window. It's a Media Browser. To preview a movie just select and click Play button. To add a movie, just drag and drop. To add photos click Photos from the media browser. Follow the same instructions with Music. The Speaker icon in the photo, indicate that the music has been added. Click the Preview button. When you finish the process click the Burn button.
