

Two-semester Return Goal Setting

NATHAN DICKMEYER

JENNY ZHU

INSTITUTIONAL RESEARCH & ASSESSMENT

NOVEMBER 12, 2015

Predicting return (or graduation) two semesters out

- **Stepwise Logistic Regression—A method of combining information on a student to calculate a probability of return.**
- **Goal: Predict the return (or graduation) of Fall 2014 degree students, based on:**
 - **Fall 2012 to Fall 2013 actual**
 - **Spring 2013 to Spring 2014 actual**
 - **Fall 2013 to Fall 2014 actual**

Factors affecting probability of return/grad Fall 2014 to Fall 2015	Percentage	Sample	Joe's
(Based on actual data from Fall 2012, Spring 2013 and Fall 2013)	C Point Impact	Student Joe	Prediction
<i>Starting point</i>	-28.13		-28.13
<i>Each year of age</i>	0.646	20	12.92
<i>Each credit earned</i>	1.02	12	12.24
<i>Each point of cumulative GPA</i>	20.22	2	40.44
<i>Each one percent of WU grades out of total grades received</i>	-1.147	0	0
<i>Being female</i>	6.57	0	0
<i>Not completing developmental math requirement</i>	-16.81	0	0
<i>Being full-time</i>	42.42	1	42.42
<i>Registering early</i>	11.37	0	0
<i>Being a continuing student</i>	-10.66	1	-10.66
<i>Being a new student*</i>	49.42	0	0
<i>Being a new transfer student</i>	24.02	0	0
<i>Being an AA degree student</i>	2.72	0	0
<i>Being an AS degree student</i>	13.79	1	13.79
<i>Being an AAS degree student</i>	-6.04	0	0
<i>Not being on a student visa</i>	-18.87	0	0
(Joe's predicted probability of returning Fall 2015)			83.02%

**Comparing a new student with a continuing student with a 2.00 GPA and 12 earned credits, the new student is missing 52.68 percentage points and already is behind more than 10 percentage points.*

Results of fall 2014 predictions

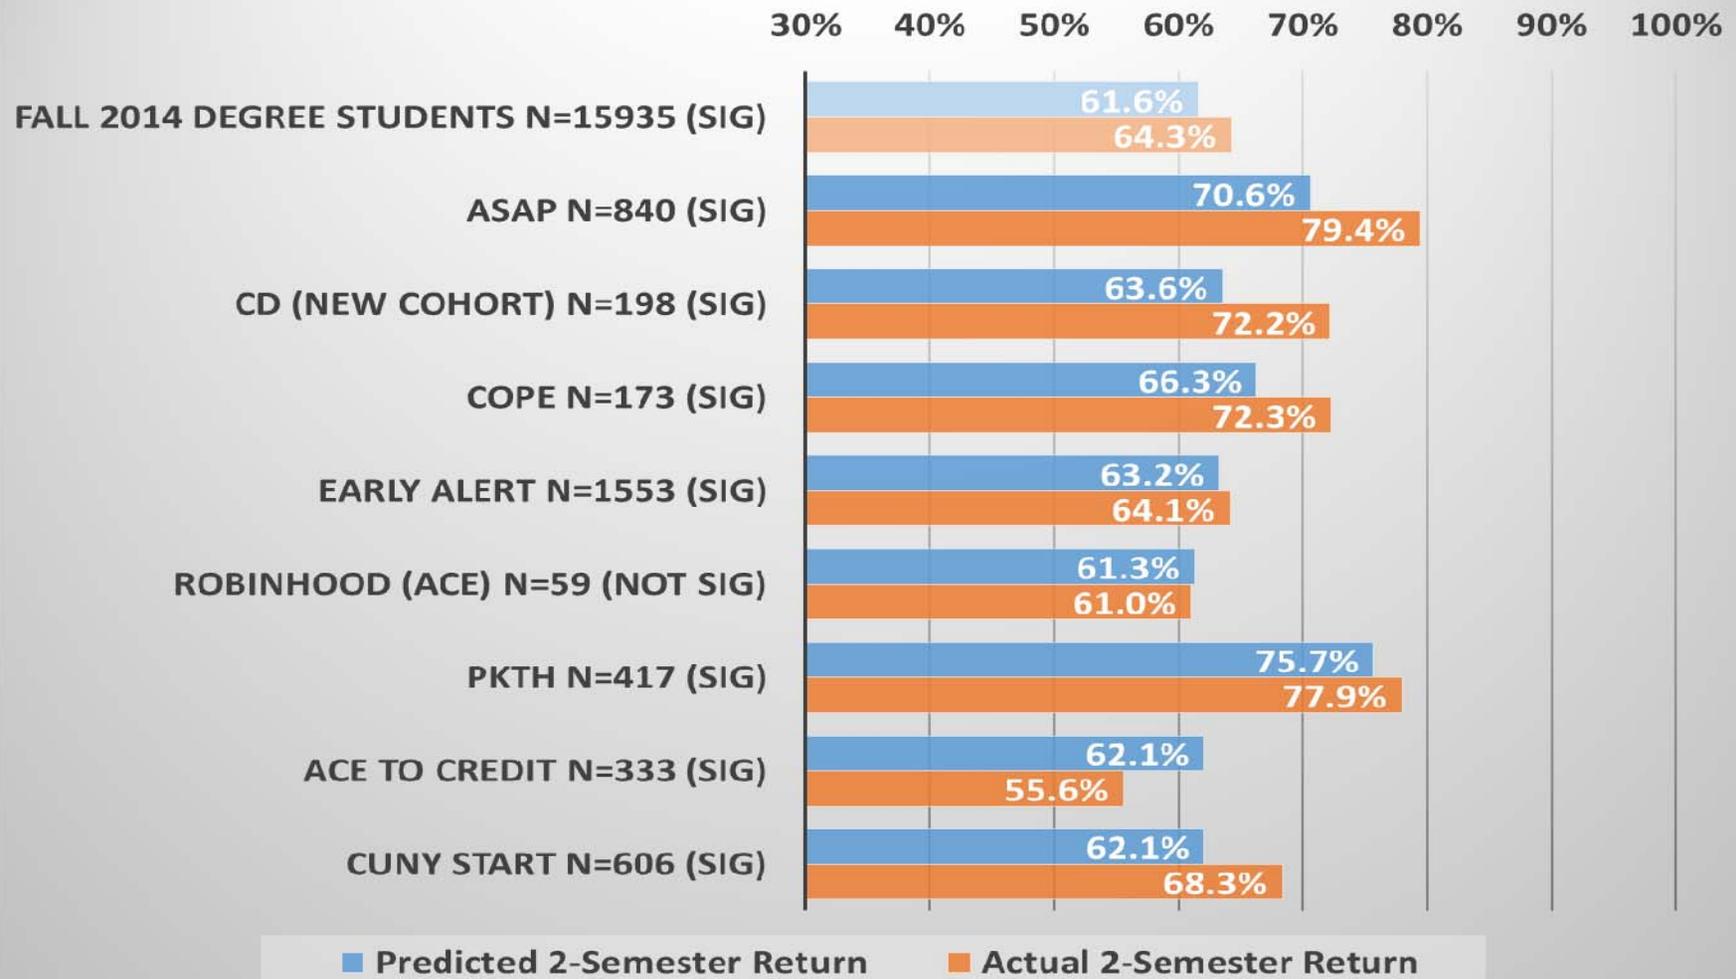

- **15,935 Fall 2014 Degree Students**
- **Predicted probability of return/graduation: 61.6%**
- **Actual return/graduation rate: 64.3% (accuracy or success?)**
- **100 students with highest probability of return: 85% returned**
- **100 students with lowest probability of return: 28% returned**

Predicted vs. actual by group code

- How did interventions do?
- How did other groups do?
- (Blue is predicted, red is actual)

Interventions (CUNYfirst "Group" flags)

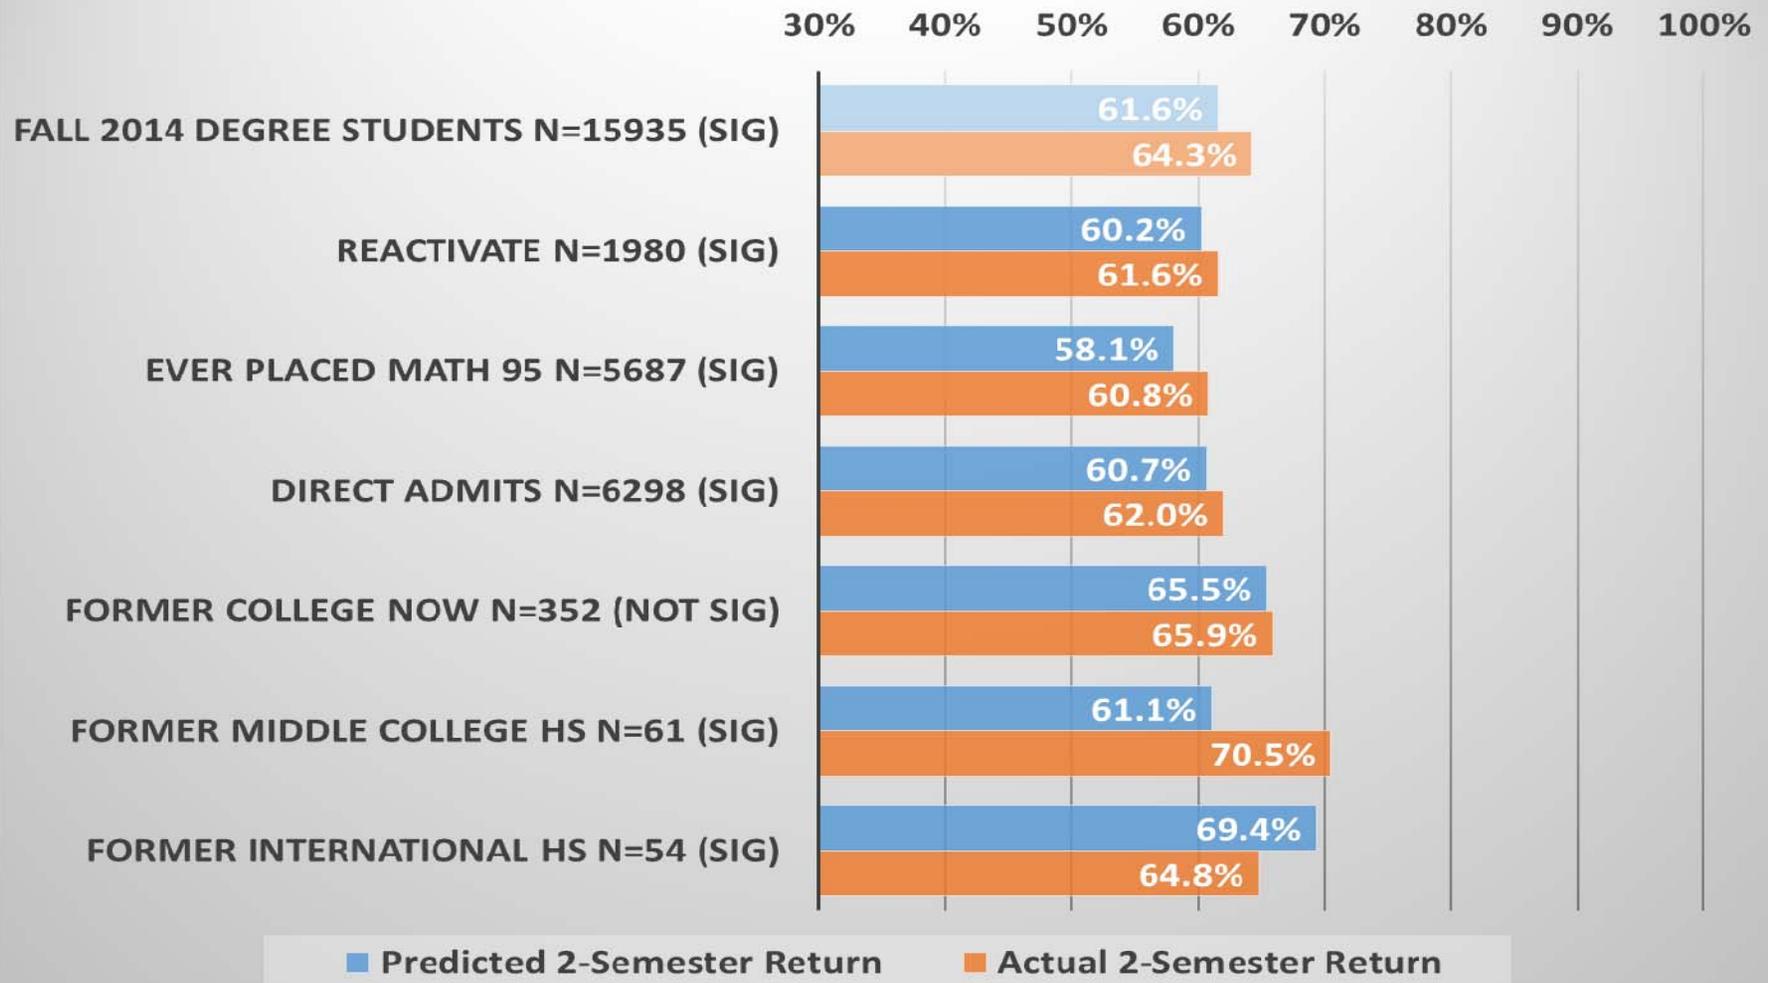

Interventions effective?

- **ASAP, College Discovery, COPE, CUNY Start are effective**
- **Early Alert was not effective (may have harmed students)**
- **PKTh did not improve an already high probability much**
- **ACE to Credit and Robinhood (ACE) may not have proper codes???**
 - **(CD based on actual list, not group codes)**

Other Groups (CUNYfirst "Group" flags)

Other groups:

- **Most show no intervention effect (as expected)**
- **Effect of math already considered in equation**
- **College Now is not an intervention**
- **High school results are unexpected (perhaps coding errors??)**

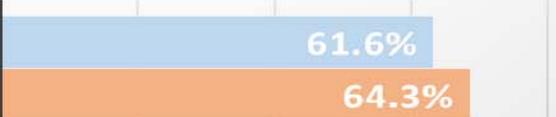

Predicted vs. actual by team

- **Some teams did better than predicted**
- **Some teams did not**
- **Some teams did not beat predicted by a significant amount**

Fall 2015 Students

- Goals by group
- Goals by team
 - (Goals are predicted return rate plus factor needed for statistical significance)

- New prediction model, based on last five semesters of characteristics/factors and two-semester return/graduation

	Fall 2014 Factors	Fall 2015 Factors
Factors	Percentage Point Impact (3 semesters data)	Percentage Point Impact (5 semesters data)
<i>Starting point</i>	-28.13	-6.49
<i>Each year of age</i>	0.646	0
<i>Each credit earned</i>	1.02	0.91
<i>Each point of cumulative GPA</i>	20.22	22.26
<i>Each one percent of attempted equated credits earned</i>	0	0.1695
<i>Each one percent of WU grades out of total grades received</i>	-1.147	-1.28
<i>Being female</i>	6.57	8.58
<i>Not completing developmental math requirement</i>	-16.81	-7.42
<i>Being full-time</i>	42.42	36.33
<i>Registering early</i>	11.37	12.72
<i>Being a continuing student</i>	-10.66	-10.73
<i>Being a new student</i>	49.42	36.68
<i>Being a new transfer student</i>	24.02	31.37
<i>Being an AA degree student</i>	2.72	3.12
<i>Being an AS degree student</i>	13.79	12.19
<i>Being an AAS degree student</i>	-6.04	-3.41
<i>Not receiving financial aid</i>	0	-3.25
<i>Not being on a student visa</i>	-18.87	-23.24

How about looking at SEMS data?

➤ Ask...

- Does visiting an office improve retention above expectations?
- Does visiting an office more often improve retention above expectations?
- Are some offices better ones to visit?

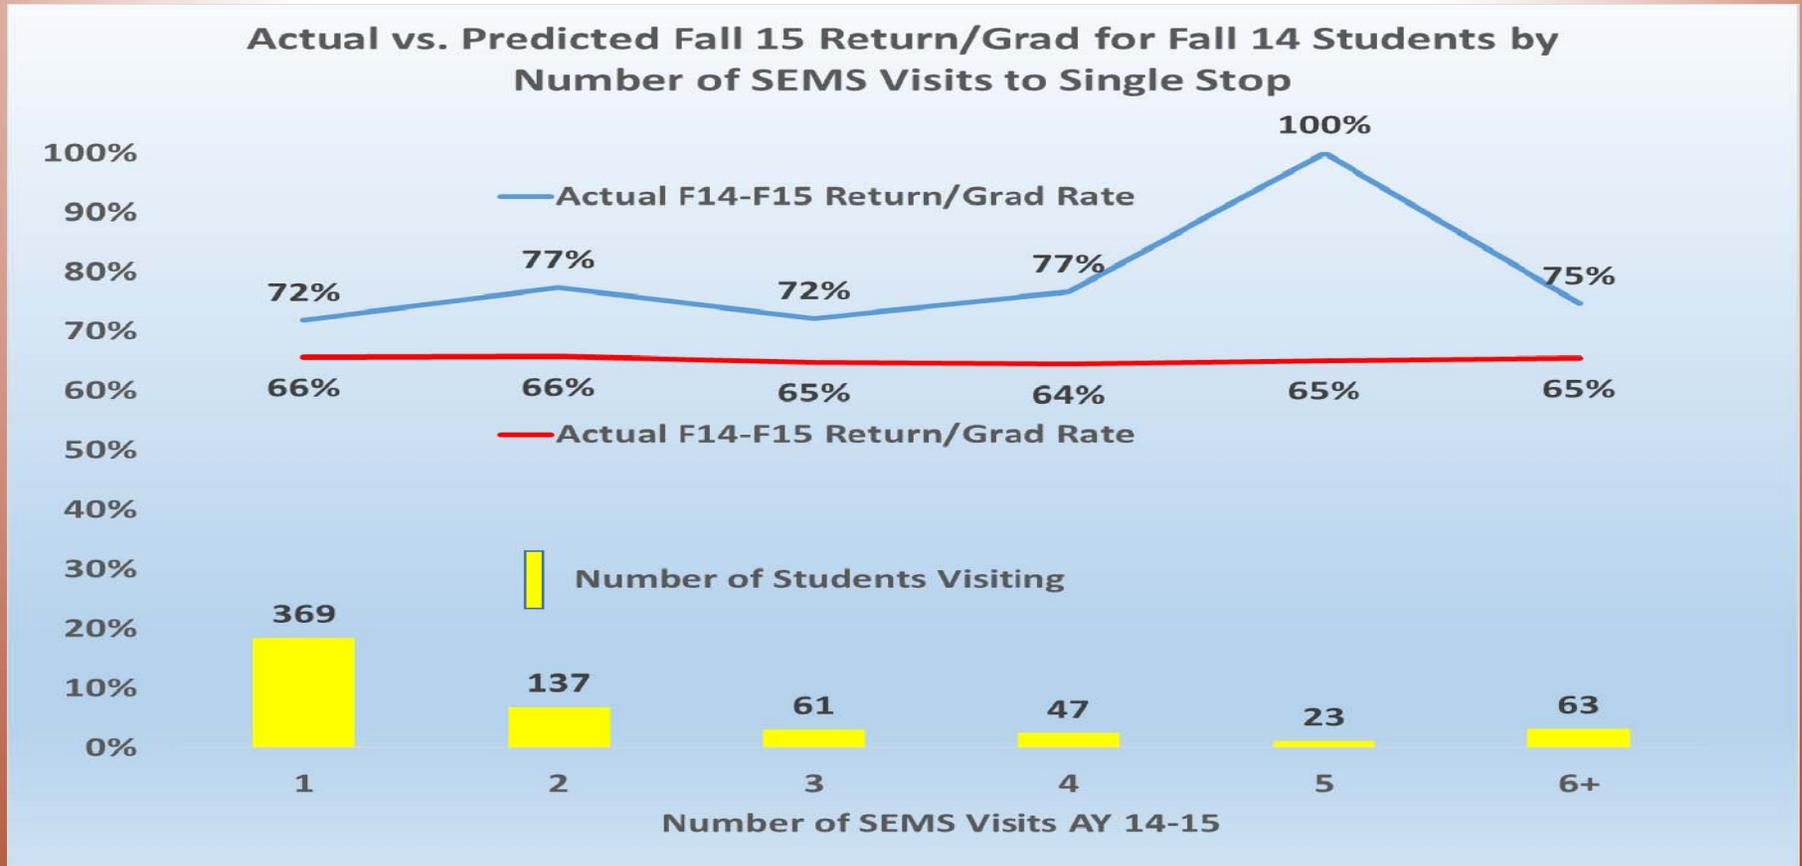

Not visiting any office is very, very bad!

Actual vs. Predicted Fall 15 Return/Grad for Fall 14 Students by Number of SEMS Visits

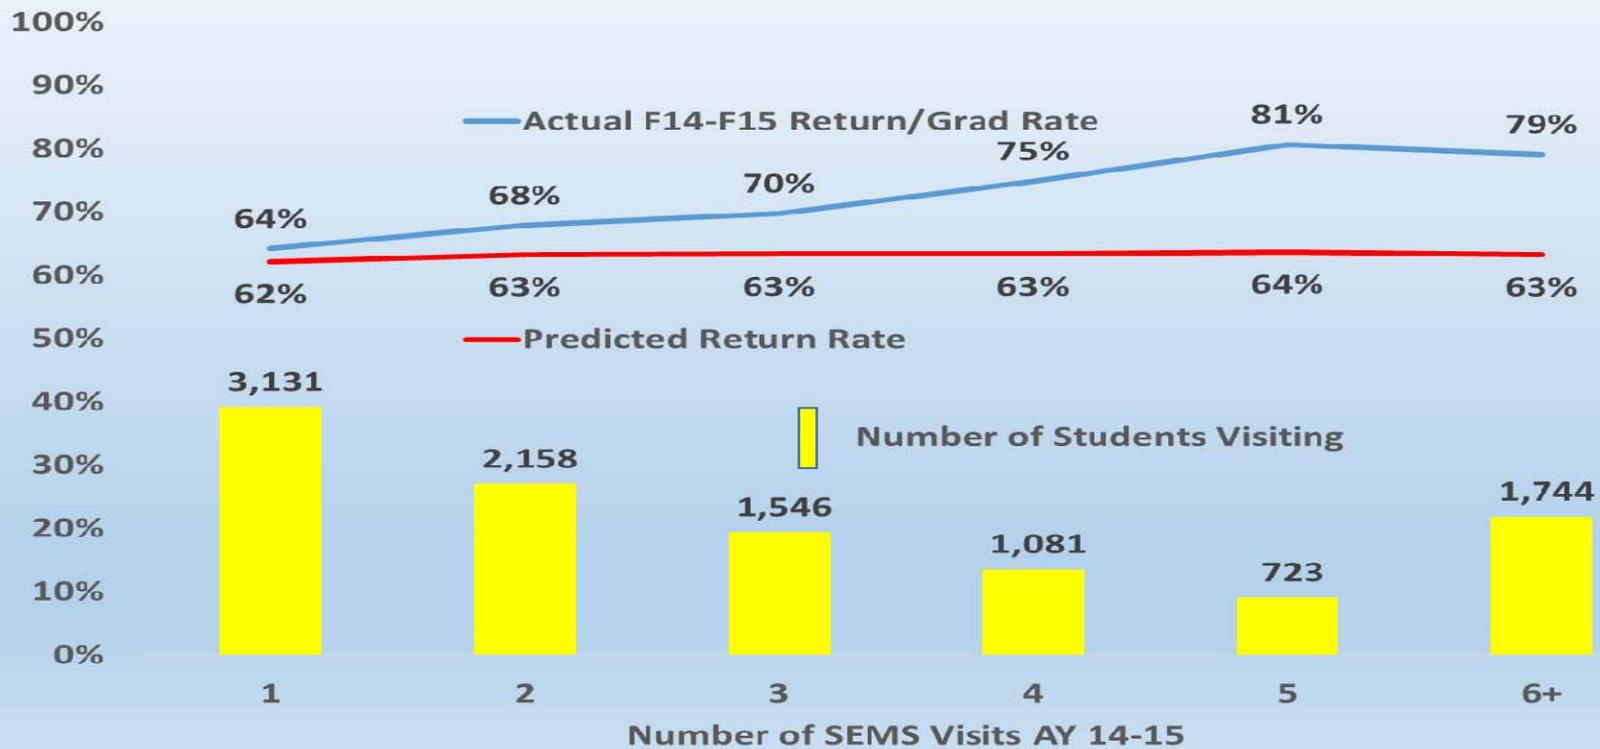

Visiting Single Stop is beneficial!

Visit C-107 Generalists more often!

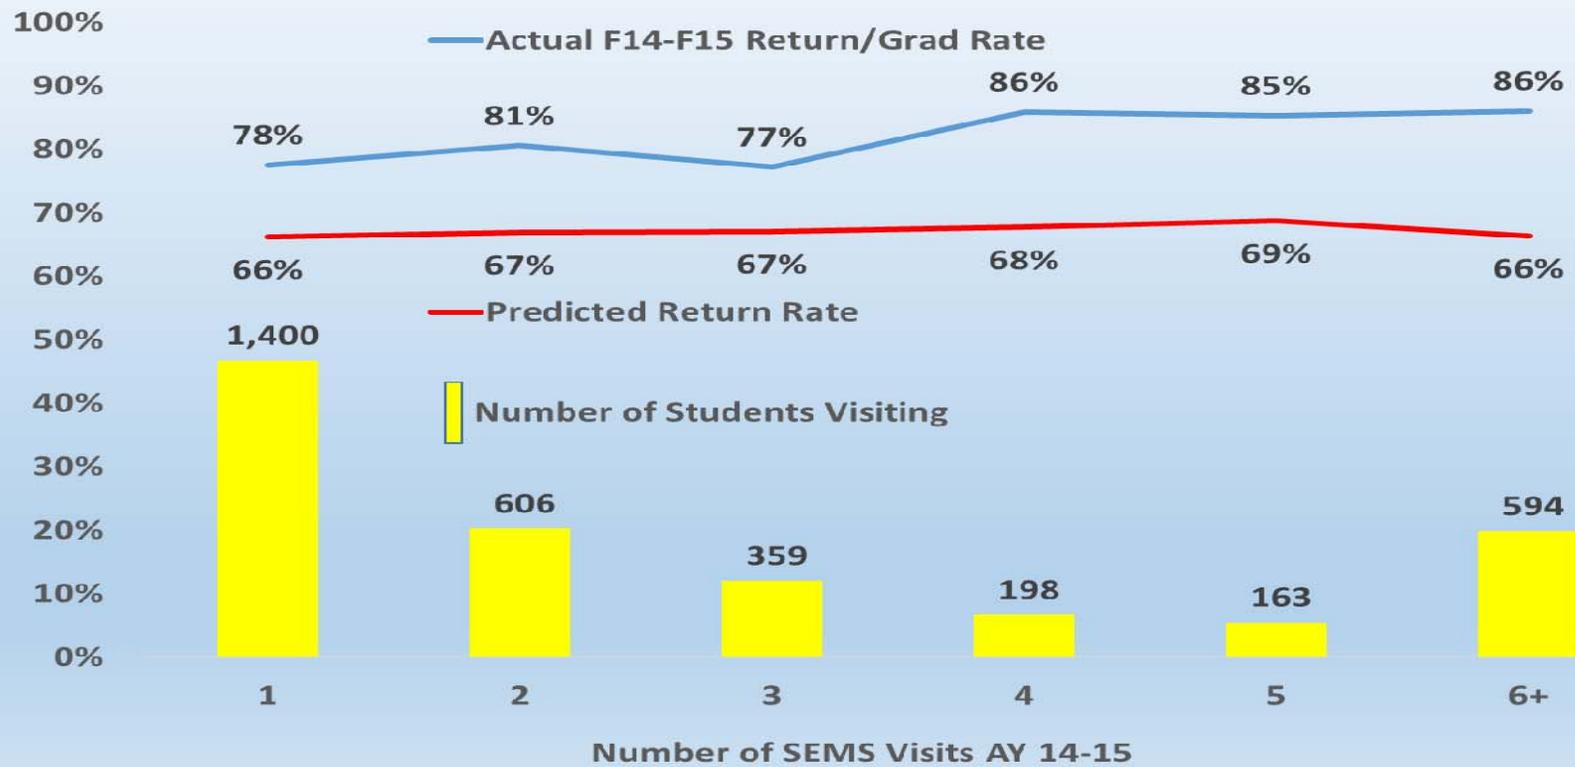

Actual vs. Predicted Fall 15 Return/Grad for Fall 14 Students by Number of SEMS Visits to Generalists

Visit Special Services at least once!

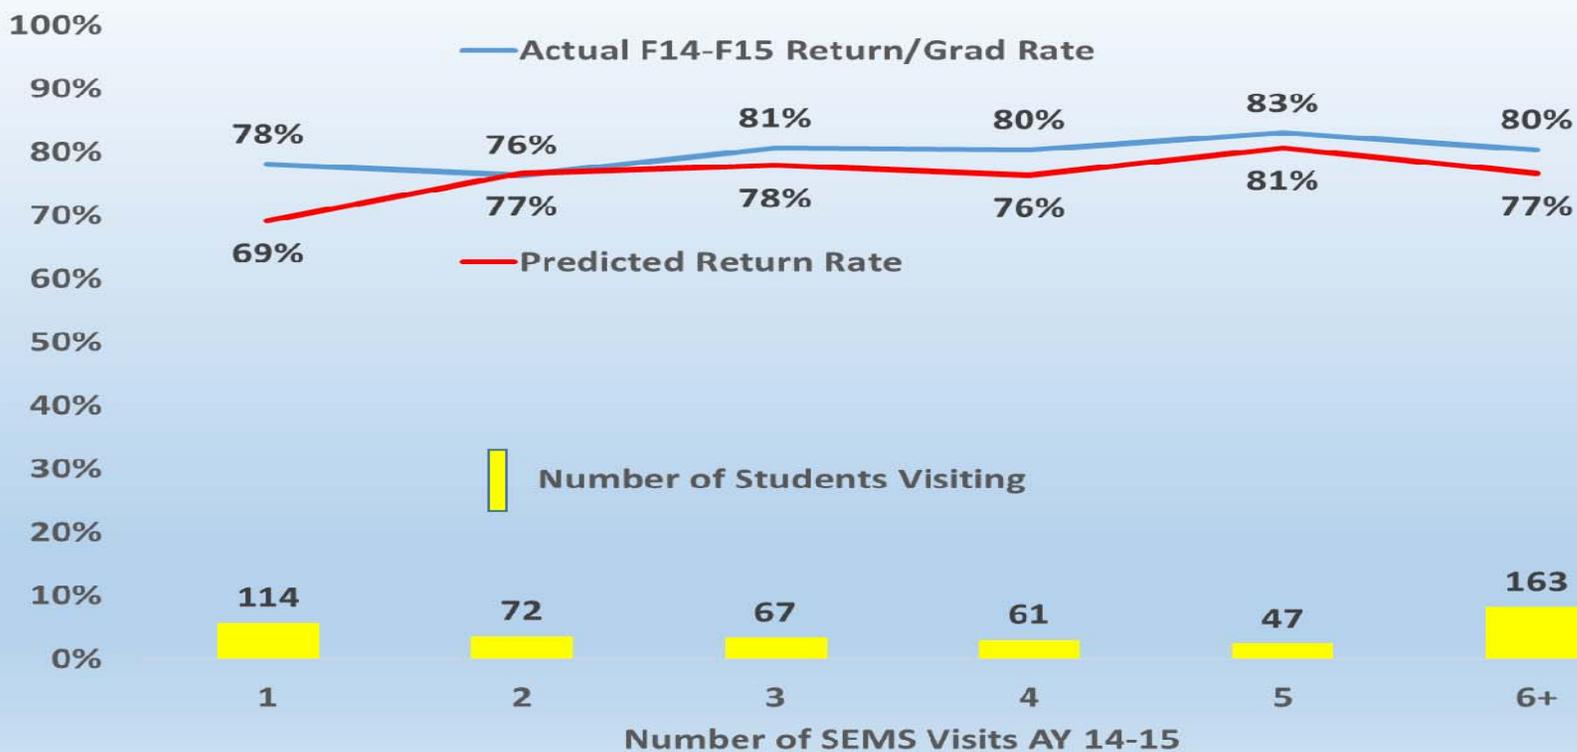

Actual vs. Predicted Fall 15 Return/Grad for Fall 14 Students by Number of SEMS Visits to Special Services

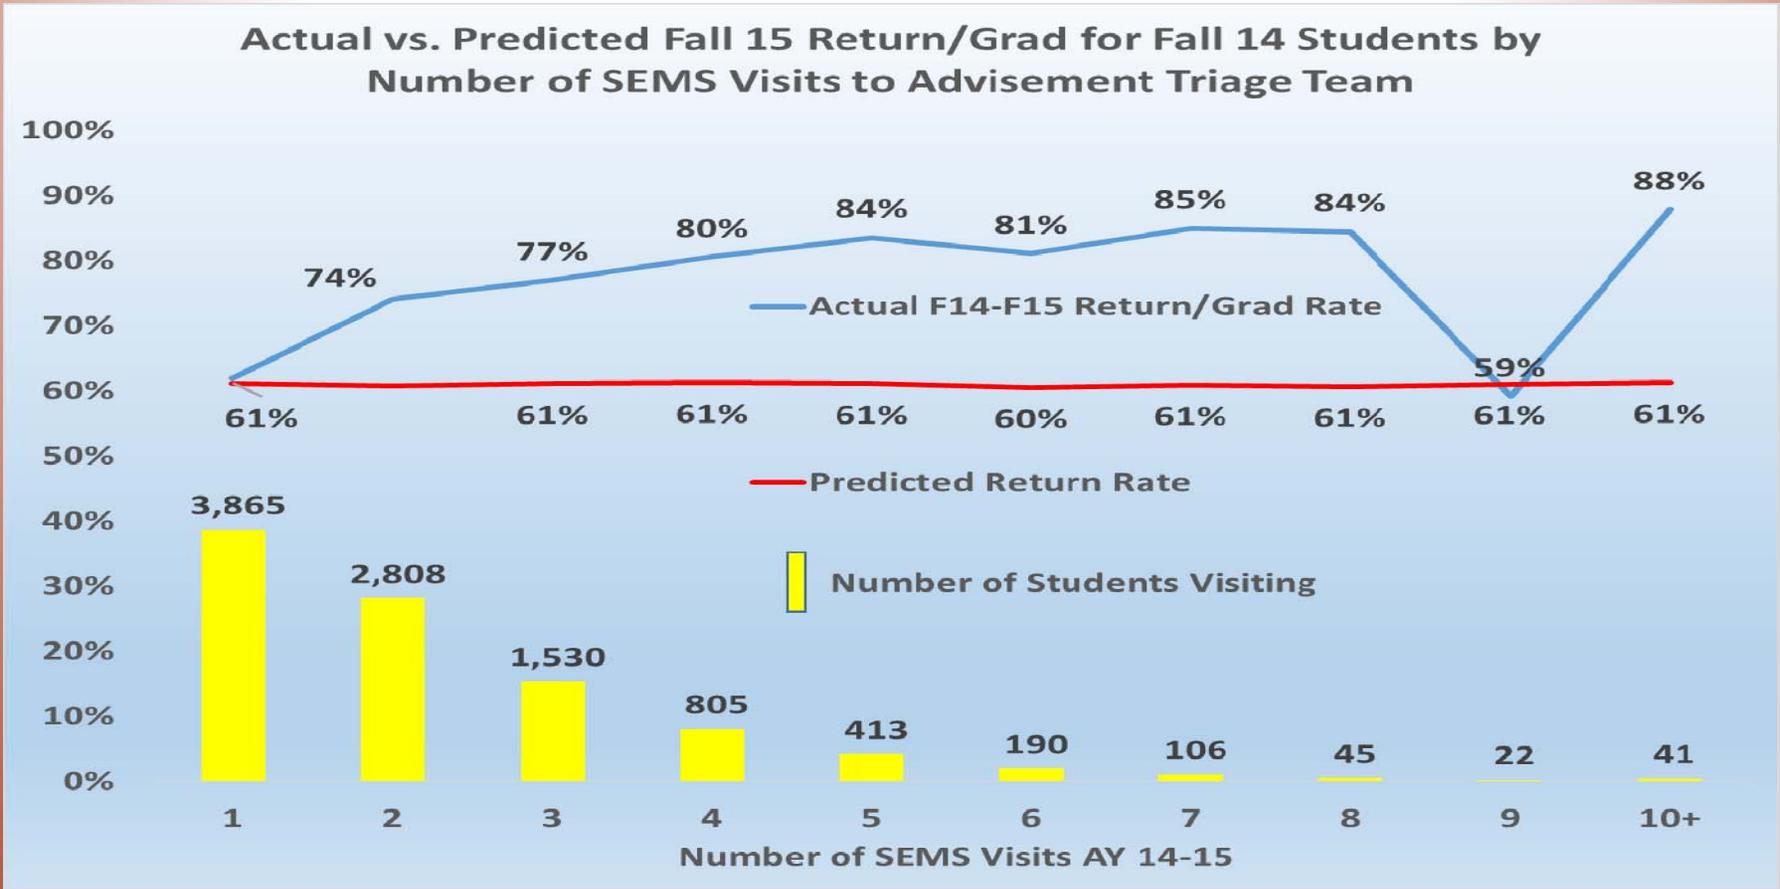

Being is almost as good as visiting International Students' Office

Actual vs. Predicted Fall 15 Return/Grad for Fall 14 Students by
Number of SEMS Visits to International Students

Seeing an advisor once is the norm. More than once helps (except not 9 times).

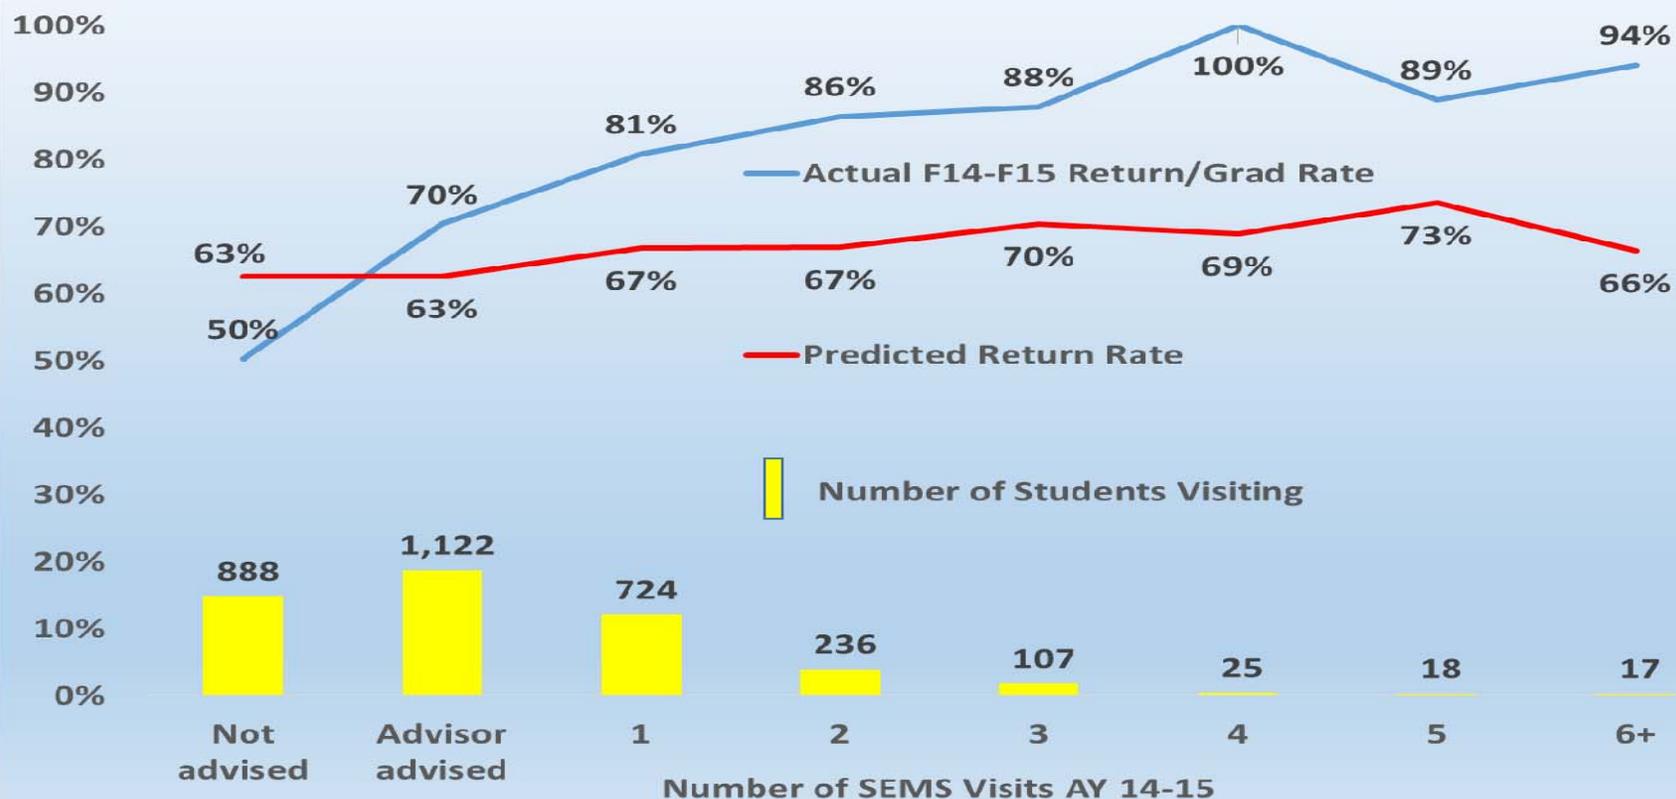

What about seeing a faculty member in a department?

- Compared to seeing no one
- Compared to not seeing a faculty member, but going to B-100 at least once
- By the number of times visiting the department (can include students who were not majors in Fall 2014)

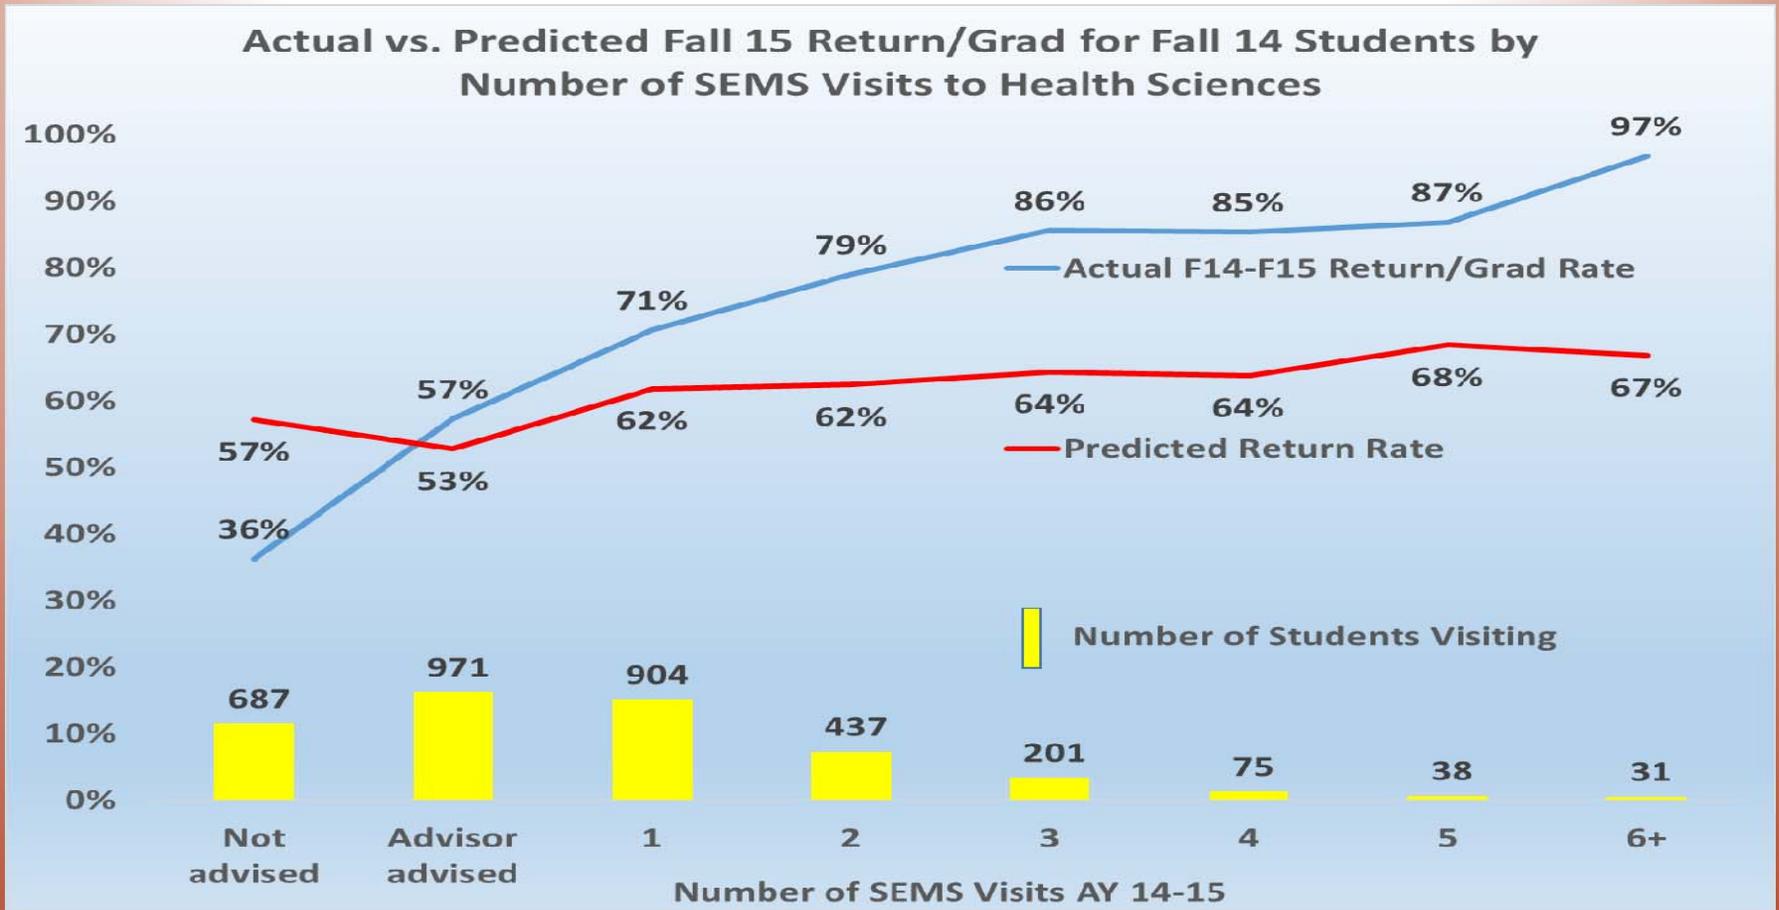

Seeing an advisor is good; Seeing a faculty member is better!

Actual vs. Predicted Fall 15 Return/Grad for Fall 14 Students by Number of SEMS Visits to Business & Technology

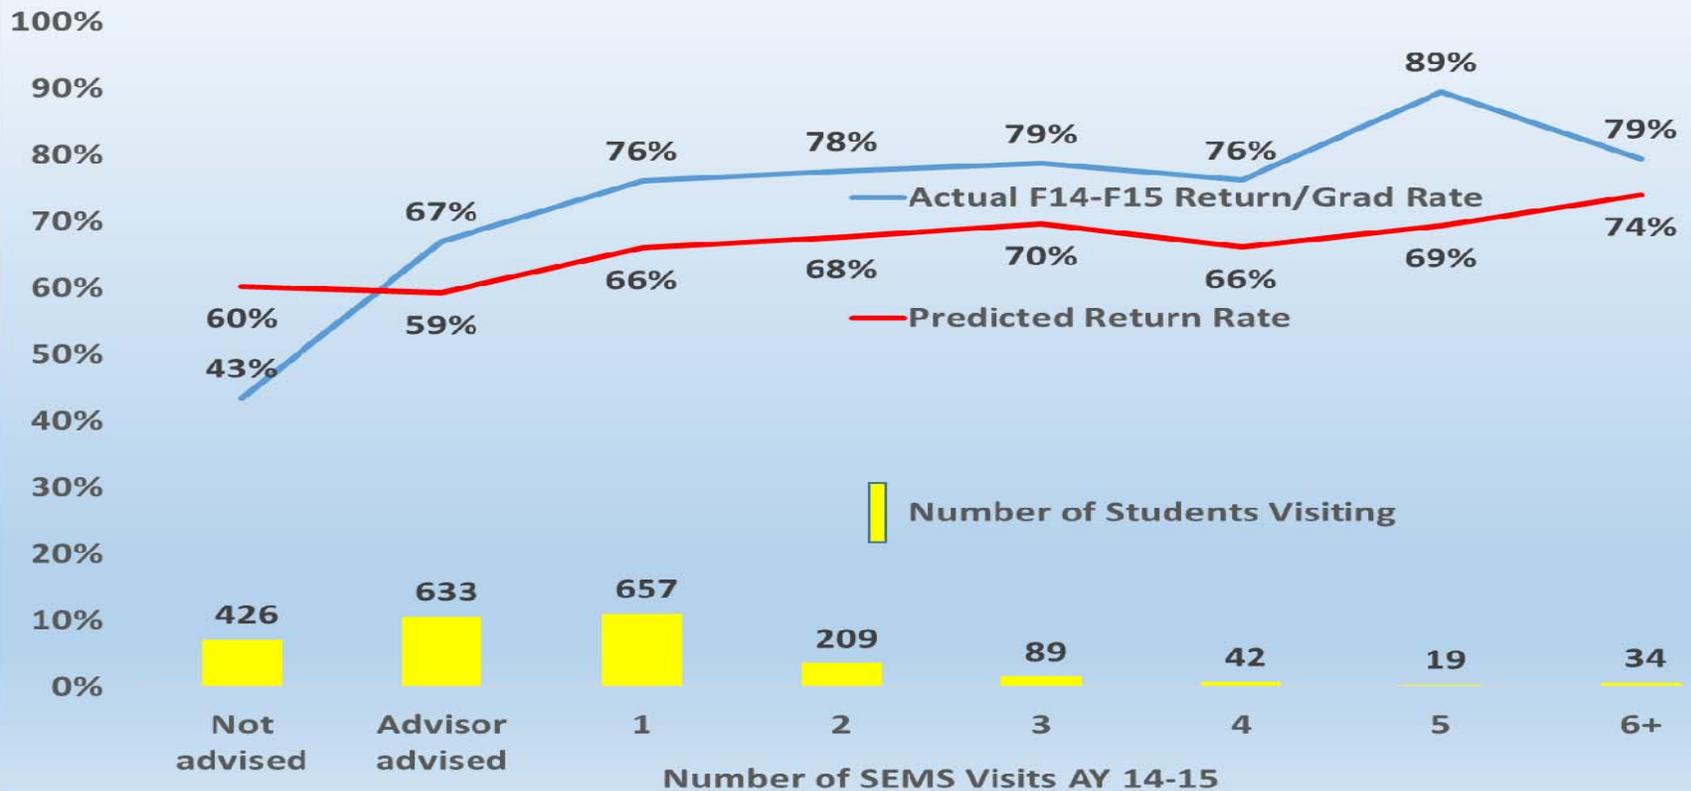

Seeing an advisor is good; Seeing a faculty member is better!

Seeing an advisor is good; Seeing a faculty member is better!

Actual vs. Predicted Fall 15 Return/Grad for Fall 14 Students by Number of SEMS Visits to Humanities

Drop-outs don't do optional!
