

MY LAGUARDIA MOMENTUM

My LaGuardia Momentum indicates your rate of progress, or momentum, toward graduation. It is based on data as of last semester and your major at that time. Students with higher momentum are more likely to graduate. Ask your Advising Team for more information.

Your GPA, or grade point average, calculates your final grades of all courses you have completed on a 4.0 scale.

Most associate degrees require the completion of 60 credits. Take 15 credits per semester to graduate in two years.

Priority Courses are considered to be critical for success in your major.

Completing developmental courses allows you to move on to college-level courses.
