

TUTORING TIPS SHEET

MAKE A SCHEDULE

Plan out your week, including class, work and study time.

If you pace your work, you won't get overwhelmed and leave everything for the last minute.

ASK QUESTIONS

If you're in class and you don't understand the homework or classwork, make sure to ask your professor or classmates for help.

PRO TIP: If you get questions wrong on a test, ask your professor for the correct response so you don't get it wrong on the final.

OFFICE HOURS

Visit your professor during office hours to help you to get all of your questions answered.

Build a strong relationship with your professor, get help if you don't understand the homework, and review projects or essays that you could use their feedback on.

FLASH CARDS

By both making and studying from them, helps with memorization.

STUDY GROUPS

Studying with friends helps by sharing notes and discussing classwork.

NOTE TAKING

It's important to take notes during class!

If you miss a class, make sure to ask your classmates for their notes.

PRACTICE TESTS

You can search for tests online or work with your study group to quiz each other.

FREE TUTORING

MATH LAB Room MB-44

Get help for any level of math, homework, projects, and going over tests.

WRITING CENTER Room B-200

Get your essays reviewed to help you improve your writing skills.

SGA STUDY HALL Room M-159

Tutors will help students with English, Accounting, Math, Reading, and Science.
