

## ORAL COMMUNICATION ABILITY

### Definition

Clear communication imparts messages to others, constructs knowledge, fosters understanding, and/or influences opinion. The ability to communicate can be demonstrated in many ways, including through essays, poems, narratives, dialogues, presentations, formal and informal speaking, digital platforms, and other varieties of methods.

### Framing Language

This rubric focuses on three dimensions of effective communication common to all forms, genre, and media (including Written, Oral and Digital Communication). These dimensions are Content Development, Purpose and Audience, and Control of Language. This rubric also defines effective Oral Communication.

### Content Development and Organization

Content is well-organized, clear and logical. Statements, claims, and conclusions are supported by evidence or narrative detail. Where applicable, facts are not confused with opinions, and sources are credible and relevant. This material might consist of explanations, examples, illustrations, statistics, analogies, or quotations from relevant authorities. Through increasingly sophisticated use of sources, student authors will develop an ability to differentiate between their ideas and the ideas of others.

Assessing content and organization will shift depending on genre. For example, communications such as essays, letters, oral presentations, digital stories exhibit organizational patterns that include an introduction, body and conclusion. That pattern reflects choices among possible alternatives, including a chronological pattern, a problem-solution pattern, or an analysis-of-parts pattern. Genres such as poetry, dialogues, and wikis may evidence a different design, but demonstrate a student's understanding of form and content. In addition to serving the assignment's purpose, student work will incorporate sources according to disciplinary and genre conventions.

### Purpose, Audience, and Genre

Communication must be appropriate to the context, and the purpose clear. The style and use of language are appropriate for the audience and purpose, and the conventions of the genre and/or discipline are respected. The purpose of communicating will depend in part on its intended effect on an audience, including work that means to persuade, report, inform, problem solve, argue, connect, or amuse.

### Control of Language, Syntax, and Mechanics

Communication is clear, fluent, and appropriate for the genre and medium. Grammar, pronunciation, vocabulary, and language choice are appropriate to the audience and occasion. Errors do not interfere with comprehension. While particular communications may require some adaptation of form, in most cases the expectation is that the author will employ the language and syntax considered to be "standard" and appropriate to academic or professional settings. The articulation, tone, volume, pace, eye contact, and body language for oral presentations are appropriate to the interaction.

For ***Oral Communication***, consider the following elements in addition to the above dimensions of effective communication:

- Voice Command: Tone, pacing, rate of speech, articulation, volume, and vocal expressiveness enhance the effectiveness of the dialogue or presentation. An effective speaker articulates with confidence, maintains audience awareness, uses their voice expressively, and uses few vocal fillers ("um," "uh," "like," "you know," etc.). Voice command can apply to artifacts that are audio-only.
- Visual Delivery and Active Listening: For video or other visual presentations, posture, body language, eye contact enhance the presentation. Active listening is exhibited by the body language, response, and reaction of the speaker.
- Dialogues: For dialogues and interactions, it would be helpful for scoring purposes if during conversations or role-play the students could identify the primary speaker (who in theory would actually deposit the artifact).
