

CHOOSING COURSES 101

Choose courses that count toward your associate degree and your bachelor's degree at the same time

Before you register, **take 20 min to research courses:**

- Review the **degree map** for your major to see which courses you need to graduate.
TIP: Footnotes contain information about which specific courses to take.
- Learn which classes fulfill the **Pathways Common Core**.
TIP: Read Pathways to Your Bachelor's on Blackboard
- Research **Articulation Agreements**, which help you choose courses that will count towards your major at your four-year school.
TIP: Read About Articulation Agreements on Blackboard
- Visit **DegreeWorks** and write down which courses you still need to take.

Before finalizing course selections, **verify your choices:**

- Use the Degree Calculator in the LaGuardia mobile app to make sure you're on track to graduate.
- **Meet with an advisor to review your course selections and avoid costly mistakes.** Not every course is offered every semester, so taking courses in the wrong sequence will *delay graduation and transfer*.

During registration, **consider course availability in these categories:**

1

Developmental courses, if needed
Remaining Math or English requirements

2

Pathways Common Core or Flexible Core courses

3

Pathways Major Gateway courses
Other courses required for your major

Academic Advising

Check **My LaGuardia** to contact your advisor and make an appointment.
